

WallBrander™

GRAPHIC SYSTEM

WallBrander™ is a wide-format, very thin aluminum extrusion frame that is attached to the wall and fitted with a fabric graphic.

The frame itself is so thin that it is hardly visible. The graphic is printed using dye-sublimation for high definition quality and unparalleled color rendering.

WallBrander™

GRAPHIC SYSTEM

For decoration, interior architecture, and point of sale.

WallBrander™ allows you to create an ambiance and immerse your clients in your brand while also communicating a distinct message. Its applications are numerous: add wall decoration, separation of spaces, showrooms, reception areas, offices, restaurants, hotels and boutiques.

No need to be handy!

The graphics are installed in the frame with silicone beading sewn on the fabric; no tools or special skills are needed. In addition, WallBrander™ assures you will always have a smooth, perfectly adjusted graphic.

Change your message at any time!

Due to the flexible fabric the graphics are printed on, they are easily changed at any time – and with shipment in just an envelope, the exchange is simple and cost-effective.
